Yu-Ju Yang Harry Yang

AI / LLM Application Engineer

+886 919 588 784 | harryang99@gmail.com | New Taipei City, Taiwan
linkedin.com/in/harryyang0512

Banking AI practitioner focused on Python APIs, RAG evaluation and prompt governance. Delivered a customer-service API, quality-analysis pipelines and a shared SDK. Master's in Robotics from King's College London, with Distinction.

Experience

Taishin International Bank | **Jul 2025 - Present**

Title changed in Jan 2026 following organizational restructuring; continuous employment.

AI Trainer | Jul 2025 - Dec 2025

Data and Model Governance Specialist | Jan 2026 - Present

Project

Bank Merger Customer Service API

- Owned API design, development, container deployment, evaluation and load testing. Integrated **FastAPI, aiohttp, Docker and Nginx** with internal retrieval; four score bands route requests to approved verbatim answers, candidate questions or fallback messages.

RAG Quality Analysis and Failure Attribution

- Automated domain classification and failure labeling for **4,400+ negative feedback records**. Replaced roughly 3 days of manual screening with a batch run plus half a day of calibration (effort estimates); added checkpointing and retries.
- Built a four-stage LLM analyzer for query, retrieval, refusal and generation quality.

Prompt Version Management Python SDK

- Owned data models, CRUD and versioning in a **PostgreSQL / JSONB** SDK, packaged as a wheel for **8+ internal projects**. A collaborator handled database operations and the Gradio admin UI.
- Implemented new-version inserts and version-pinned reads for prompt history. Encapsulated parameterized SQL, public APIs and logging to centrally manage application and evaluation prompts.

Technical Skills

Application / evaluation: Python, FastAPI, asyncio, aiohttp, pandas, RAG evaluation, LLM-as-a-Judge

Data / deployment: PostgreSQL, psycopg, JSONB, Docker / Compose, Nginx, Linux, uv, wheel

Machine learning: PyTorch, scikit-learn, OpenCV, SHAP, LIME | **Languages:** Mandarin (native), English (fluent)

Education

King's College London | Master's in Robotics, Distinction | 2023 – 2024

Chung Yuan Christian University | Bachelor's in Electrical Engineering | 2018 - 2022
